Snap On 3000 Hinges

Feature:

All-metal hinge

Benefit:

Recyclability and durability are the hallmarks of Grass all-metal hinges.

Feature:

All load-bearing parts are hardened

Benefit:

Reliable, outstanding stability, top quality and long service life.

Grass Snap On 3000 is the most stable hinge on the market.

Feature:

Hinge cup fastening as screw-on, dowelled or (RTA) Multi Lock versions

Benefit:

The right solution for every manufacturer. Screw-on version for cabinetmakers, dowelled version for OEMs and RTA Multi Lock as the ideal cup fastening for CNC-based manufacturers.

Feature:

Wide range of options

Benefit:

Large number of individual applications for cabinetmaking practice. Grass offers every thing from the thick door and aluminium frame hinge to a wide variety of corner solutions.

Twist Lock Hinges

Feature:

Slender, elegant hinge cup

Benefit:

Perfect good looks and neat concealment of the drilled hole. Any ragged edges are neatly hidden.

Feature:

Closed-base hinge cup

Benefit:

The drilled hole is entirely concealed from view. Recommended in particular for doors with particle board core.

Feature:

One connector cup for all types

Benefit:

This means that all Twist Lock types are fully interchangeable. Subsequent changeovers, e.g. from a 110° to a 165° hinge, can be performed with no tools required.

Feature:

Twist Lock the reliable cup connection

Benefit:

Repeated installation or removal of the hinge will not impair the stability of the cup connection. The Twist-Lock connector cup is made of metal.

Baseplates

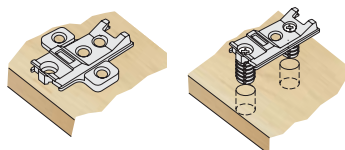

Feature: **One system for Snap On 3000, Multi Lock and Twist Lock**

Benefit: Major advantage for logistics and production as the same baseplates and identical drilling positions can always be used.

Feature: **Grass offers the widest range of baseplates**

Benefit: Wing or straight baseplates for screw mounting or insertion - Grass offers every solution. In addition, Grass is the only manufacturer that provides wing baseplates for a space of 0.5 mm. These are used for furniture which is required to be virtually dustproof.

Feature: **Awards and certifications**

Benefit: Grass products are quality-certified. That means reliability and attested durability.
