

INOS LAGO

Stainless Steel Sinks from Tekform

Manufactured to International Standards from grade 304 0.8mm stainless steel, the **INOS LAGO** – kitchen sink range from Tekform, are built to last and meet Australian standard AIS1304. **Como**, our entry level sink range is manufactured in two pieces, meaning the fascia and bowls are drawn separately and then welded together. This results in a more functional and stronger sink, giving you flatter and deeper bowls. Basket wastes are standard with all models together with sound proofing to the bottom of bowls and drainer. All models are available in left and right hand bowl configuration.

Chrome Sink Mixer Tap with 5 year warranty manufactured to Australian Standards – **AS3718DR**
